Thursday, December 5th, 1946

Number 32

Newly arrived at CBC's Prairie Region Headquarters in Winnipeg is Miss Catherine Melver who takes the post of assistant in the Talks Department in charge of women's interests. Miss Melver is a native of Barva, Saskatchewan, and a former teacher.

Miss LaVaun Matkin of Magrath was a visitor in town Tuesday. She has just returned from a mission in the east.

First Ward Sponsors Supper

Thursday evening December 5th the First Ward sponsored a supper to raise funds to buy an organ for the First Ward Church. The supper was served in the Opera House to more than 400. A complete program has been drawn up for the coming season to further swell the fund for an organ.

A program of an hour was enjoyed after the supper.

STIRLING NEWS NOTES

By Mrs. Lief Erickson

Mrs. Earl Nelson, who has been a patient at the Galt Hospital for the past week returned to her home on Sunday.

Mr. Clifford Hirsche and his bride have returned from their honeymoon and have taken up residence in the old Hirsche home.

Born to Mr. and Mrs. Mike Bodnaruk at a Lethbridge hospital a son.

Mrs. Ned Woodruff of Picture Butte is visiting her sister Mrs. Lyman Hardy.

Everyone is pleased to note that we are to have a new business building in our village. Mr. B. N. Peterson has this building under construction to house Massey Harris products. It will be a welcome addition to our business section.

Mrs. M. Johnson and her baby son have returned home from the hospital.

Mrs. Lloyd Erickson and daughter Judith Anne spent Friday and Saturday visiting her parents Mr. and Mrs. Curtis West.

The Historical Pageant, 'A Salute to Stirling', which was presented by the High School Dramatics Class proved to be one of most interesting and enjoyable affairs staged here for some time.

More than eighty of the school children took part and much credit is due the Dramatics teacher, Mr. Candy, for the success of this outstanding presentation.

It was presented two evenings to large audiences and the proceeds will be turned over to the local library board.

Christmas is less than three weeks away. This is the season when every member of your family and many of

Million Dollar Beet Pay

Sugar beet farmers of southern Alberta, Friday, received the second initial payment on the 1946 beet crop. This payment represents \$8 per ton on 141,000 tons of beets.

To date approximately 270,000 tons of beets have been delivered to the mills and an estimated 20,000 tons are still in the fields.

Heavy snow falls caught the farmers in the centre of harvesting operations and has made it extremely difficult to harvest the crop.

Approximately 1400 farmers will share in the payment which is over a million dollars.

Snaps & Scraps

One hundred and fourteen guests partook of a lovely banquet Friday evening given by the Stake MIA, the Senior Scouts and Junior Girls. After the banquet the balance of the evening was spent in dancing.

The flag of Spain, although being a flag of the republic since 1936 still carries the same colors as that of the flag of King Ferdinand 11 of Aragon and Queen Isabella. At the time of King Ferdinand and Queen Isabella the flag carried a scroll that entwined around the pillars of Hercules which read, "Ne Plus Ultra" or "No more beyond". After Hercules proved the earth was round, the scroll was changed to read "Plus Ultra" or "More beyond". The design on the Spanish flag has been changed many times, in fact the red and yellow colors are all that today's flag has retained from the old one. The coat of arms on the flag of today trace the development of the states of Spain, which became a kingdom and years later a republic.

The month of December takes its name from the old Roman Calendar which started with the month of March, which made December the tenth month. It was named for the Latin word "Decem" or ten.

The Holy tree, known as the Christmas plant does not bear flowers in the winter but in the early spring and by the time Christmas comes the seed or bright red berry is beautiful to the eye.

For producing the color in glass, metallic oxides are used.

NEW BOOKS

These books were a donation from the Book Lovers' Store.

'At The Sun Ring Pool' a tiny tot book 'Poems of Childhood' by Riley 'Nursery Rhymes and Song for Children.'

'A Picture Dictionary for Children' 'A Picture Almanac for Boys and Girls'

Local Happenings

Reported by Elsie Mitchell

Miss Ida Hicks who has been working in Cuba has returned to her home here.

Miss Tilda Valgardson of Taber visited with relatives here Sunday.

Mr. and Mrs. Wayne Gibb and baby son of Picture Butte spent a few days here last week, guests of Mrs. Gibb's parents Mr. and Mrs. M. Cooper.

Mrs. Hazel Hervey and two small daughters Paula and Carol of Byemore, Alberta have returned to Raymond to spend the winter months. Mr. Hervey is expected this week.

Mr. and Mrs. Ray Powland and baby of Del Bonita were week end guests of Mrs. Powland's parents Mr. and Mrs. Stan Greep.

Mrs. Martha Woolley visited in Cardston over the week end with her mother who met with an accident recently.

Born to Mr. and Mrs. Doral West, a baby girl.

Miss Yvonne Meeks, small daughter of Mr. and Mrs. Ted Meeks was operated on for appendicitis and is now getting along nicely.

Mr. and Mrs. Caesar LeCluse are receiving congratulations on a son, born at the Municipal hospital.

Miss Joyce Breckon of Stirling is a patient in the local hospital.

Miss Bernice Bascom who is employed at the McIntyre Ranch in Magrath is home for a few days.

Mrs. T. K. Roberts and son Gordon and daughter Mrs. Mildred Wood accompanied Mr. and Mrs. Douglas Kennedy of Lethbridge to Great Falls where they spent a few days.

Miss Barbara Turner, nurse in training at Vancouver is holidaying at her home here. Miss Turner is to report back to her duties January 1.

Vancouver soprano, ANN WATT, whose new program has just made its debut on CBC's Trans-Canada network on Wednesday nights has recently returned to Vancouver from Edmonton, where she performed in recital at the invitation of the Women's Musical Club of that city. It was a return visit for Miss Watt, as she had appeared there to star in a production of Britten's 'A Young Person's Guide to the Orchestra' in 1944. This time she flew both ways by T.C.A. and reported a delightful four-

Miss Joyce Milner was hostess of the Girls Club Friday evening when an enjoyable evening was spent at her home.

The Musical Society and Thelma Pitcher entertained friends Monday evening. Cards were enjoyed and a lovely lunch served by the hostesses.

Friends will be sorry to hear that Mrs. Eph Gough is ill at her home.

Mrs. Frank Tober was a dinner hostess last Thursday evening when she entertained twenty four guests, the occasion being the American Thanksgiving. Mr. and Mrs. Charles Asplund of Lethbridge were out of town guests.

Special interest groups of both wards held parties last week. Lovely chicken suppers were served and the interesting program was given on Pioneer Life. Dancing concluded a very pleasant evening.

Mr. and Mrs. Godfrey Holmes and Mr. and Mrs. Lee Brewerton motored to Great Falls this week for a few days of shopping.

Gerald Watson is in Calgary where he will take a course for the next 3 weeks.

Monday evening friends surprised Mrs. V. J. Harney at her home, the occasion being her birthday. Four tables of bridge were in play, high score going to Mr. and Mrs. Ray Atwood and her to Mrs. Harold McKen.

Mr. C. R. Wing is in Idaho on business this week.

Mr. and Mrs. Wilbur Carter of Nelson B. C. were Raymond visitors this week. Wilbur lived here with his parents some time ago. He was married just a week ago and included Raymond on his honeymoon trip.

Mr. and Mrs. George Everson of S. Dakota and their daughter, who is living in New Mexico have been visiting Mrs. Everson's brothers the Flexhaug boys.

Juvenile Delinquency

While some people do not give much thought to juvenile delinquency, I think that this is one of our most serious and important problems in Canada today. Not only for the Police in our cities and towns but also parents and service organizations alike.

First of all it may be well to see what a "delinquent child" means insofar as the law is concerned. It means "that any child under 18 years who violates any provisions of the Criminal Code, Provincial Statutes or any Municipal By-law is a delinquent." Another definition of a "delinquent" is—"A child in need of correction." This one, I believe, fits the picture better than the legal one.

Some persons are all too quick, when a child gets into trouble to say "Why don't they send him to jail?" That to my way of thinking is entirely poor judgement and lack of knowledge of laws and court procedure.

Our legal authorities have made provision for a special Court known as a "Juvenile Court" to handle these matters.

It is a general practise to keep away from procedure that is followed in ordinary Police Courts. It could well be called a private meeting between the Juvenile Judge and the delinquent child and parents. Police do try and get to the bottom of the matter and try and remedy it to the best of all concerned. It is a very hard, and in most cases, thankless job. Co-operation is needed, especially from the parents, in some cases I'm sorry to say we do not receive this. In fact all the police receive for their efforts of tracking down and curing these "minors" is a "broadside" from the parents in "earshot" of the child. These are hopeless cases and generally turn out to be "repeaters" with a bad end in sight.

Getting back to our "Juvenile Court" or meeting as mentioned before. The Juvenile Judge has considerable jurisdiction according to the seriousness of the offence charged. He can do any of the following:

- (1) Impose a fine on the child
- (2) Impose a fine on the parents if at fault.
- (3) Commit child to an institution
- (4) Commit the child to a foster home
- (5) Suspend sentence.
- (6) Dismiss the case.
- (7) Impose such further or other conditions as may be deemed necessary.
- (8) If the fine cannot be paid by the child the parents may be ordered to pay same.

The last section I believe seems unsatisfactory as in most cases the parents are all too ready to "pay up" and the child gets off free. At all Juvenile Courts the attendance of the parents or some other responsible person is compulsory. No report of a trial or charge against a delinquent child can be published in any newspaper etc. So we can plainly see that these matters are not treated in a manner to "railroad" a child but to try and put him on the right path and to curb him from breaking the law. The person who said "send him to jail" will see what sort of proposition the authorities are faced with when there is no "jail" for these offenders. A child under 18 would be a good "student" for some of the convicts in our jails, he would be well versed in the "art of crime" when he came out of jail.

Taking all these things into consideration what is the remedy for this delinquency. I will try and give my views in a later article in this paper.

J. E. Pittaway, Town Constable

CARD OF THANKS

We wish to thank all those who so kindly expressed their sympathy in our most recent bereavement. Also to all those who sent floral offerings, letters, cards or in any way helped.

Mrs. Margaret Jessop and family

In See "Big Town" at the Capitol Sat. "The Killers" are coming

G. Douglas Steel, principal of Prince of Wales College, Charlottetown, who was recently appointed to the board of governors of the Canadian Broadcasting Corporation. A Prince Edward Islander by birth, Dr. Steel has for many years been a leading educationalist in the Maritimes.

Rotarians to Play Host to Santa

The intersection at Broadway and first street north will be the scene of one of the gayest celebrations of the year Friday afternoon, December 20th, when the Rotary Club of Raymond will play host to an estimated one thousand children from ages twelve and under.

A twenty foot Christmas tree will occupy the place of honor and will be decorated and lighted and information has been received that weather permitting Santa will arrive for the occasion by plane and no doubt his bag will bulge with gifts for every child.

This is the first year the Rotarians have attempted this pre-Christmas visit of Santa and they hope that they can make it an annual affair.

The party is free to children 12 years and under and promises to be a big event.

Miss Geraldine Krige of Magrath was a guest this week at the home of her brother Jim.

Gordon Robbison and Elmo Still who are in Phoenix Arizona were contestants in the Rodeo there, Gordon placing first in the bareback riding and Elmo placing third.

Welling NEWS NOTES

by Mrs. E. K. Enlock

Born to Mr. and Mrs. Allen Ackroyd of Hollywood California a girl, Mrs. Ackroyd is the daughter of Mr. and Mrs. George Bullock. Mr. Ackroyd is formerly of Magrath.

No Mutual has been held the past two Tuesdays on account of the condition of the roads.

Considerable beet hauling was done last week regardless of the snow. Snow beets is certainly not a misnomer.

The High School held party at the school Friday night. A large crowd was there in spite of the weather.

The small son of Mr. and Mrs. Ken Wilde has been quite ill.

Keith Wilde, son of Dena Wilde had the misfortune to bite his tongue and had to have three stitches taken.

Miss Elsie Bullock has taken position at the Municipal Hospital in Raymond.

Mr. Dick Chipman is not going to resume his studies at the Calgary Tech as his services are required at home on account of his father's health.

Miss Joyce Wilde, daughter of H. Wilde was taken to the hospital Tuesday for an appendectomy.

The Effect Of Strikes

THE CRIPPLING EFFECT OF STRIKES on Canada's industrial life and on the success of the reconversion program here has been felt in many places. Shortages of materials resulting from these work stoppages have been responsible for a serious drag in the production of necessary articles ranging from nails to trucks, and from men's shirts to soap and glass. As long as critical shortages exist it is clearly in the interest of consumers to maintain price ceilings and other wartime controls, since to lift these before the supply is equal to the demand, would be to invite disastrous inflation. In spite of controls, black markets have sprung up in some parts of the country in nails, lumber and other articles in short supply, and it is apparent that a normal peacetime economy will not be restored until production can go forward without hindrance.

Decline Seen In Industry

The full effect of strikes on the life of the Canadian people was pointed out recently in an address delivered in Winnipeg by Rt. Hon. C. D. Howe, Minister of Reconstruction and Supply. At that time Mr. Howe told of the manner in which steel and coal strikes in the United States, followed by the lake shipping strike, the strike of lumber workers in British Columbia, the soda ash strike in Ontario and the prolonged strike in the Canadian steel industry slowed down construction work, manufacturing and other vital industries which had begun to expand to meet the heavy demand for goods after the war. "The expansion process, which had begun in March, started to falter in May, as a result of the strikes," Mr. Howe said, "and since then there has been a decline in many industries."

Interests Of Many Affected

In solving the problems which have arisen as a result of the strike situation, Mr. Howe suggested that a spirit of co-operation and mutual aid is needed among all those whose interests are involved. Those whose interests are affected include a large group, not only labour, management and the government, but producers and consumers throughout the country whose business interests and standards of living are affected when strikes are declared. All Canadians, no matter what group they represent, look to full employment and a high standard of living as a basis of security and progress in the years to come. In the words of Mr. Howe, these can only be achieved by "new and vigorous types of co-operative action between federal and provincial governments, between management and labor, and between government as a whole and industry as a whole."

FAST SURE RELIEF FOR SIMPLE HEADACHE ASPIRIN

GENUINE ASPIRIN IS MARKED THIS WAY

SMOKERS CAUSE BRIDGE TO CATCH FIRE OFTEN

SYDNEY, Australia.—The 1,650 ft. long single span bridge across Sydney harbor catches fire on an average of once a week. The fires occur in the wooden decking of the rail track sections. The main causes are cigarette butts, which lodge in crevices jammed with old tram tickets and are fanned by the wind. It has become necessary to increase the number of hydrants to one every 100 feet.

MATCH LIGHT UNDER WATER

OSWEGO, N.Y.—A convenience afforded to service men during the war soon will be available to civilians. The match company has begun the manufacture of water-resistant matches at the rate of 7,500,000 daily. The matches, which will light while wet, are guaranteed to function even after complete submersion for four hours.

Price Control And Rationing Information

Q.—Has the price of prunes been increased?

A.—The Wartime Prices and Trade Board has announced a four to five cent increase per pound in the retail price of prunes. This increase reflects the recent uncontrolled price rise in the United States, the Board said.

Q.—How many sugar-preserves coupons become valid in the month of December?

A.—There will be three sugar-preserves coupons valid in December, \$36 is valid on December 5 and \$37, \$38 become valid on December 19.

Q.—Is it possible for a civilian to purchase a suit without a priority suit certificate?

A.—After October 30 no priority suit certificates were issued for the purchase of gentlemen's suits. The certificates issued previous to October 30 were to be honoured until the end of December, and thus after that date ex-servicemen and civilians will stand an equal chance in purchasing their suits.

Q.—I am planning on selling my business and as I handle rationed commodities I would like to know if it is necessary to advise the Ration Administration of this.

A.—Any change in the ownership of a business which handles rationed goods must be reported immediately to the local branch of the Ration Administration.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Harassed Minds

Psychiatrist States First Twenty Years Of One's Life Is Most Critical

MONTREAL.—The first 20 years are the hardest, and the most critical. What one learns in the first two decades may condition his feelings of anxiety and guilt for the rest of his life.

This was emphasized by Dr. D. Ewen Cameron, director of the Allan Memorial Institute of Psychiatry, in an address at a parents' meeting in St. George's School, Westmount.

"All of us," he said, "know people who are crippled by anxiety, who cannot make decisions, who take jobs far below their capacity because they cannot stand responsibility."

"All of us know people who are harassed by feelings of guilt over the most trivial things, who are so excessively scrupulous that they can never feel their work adequately completed, so conscience-ridden that they cannot enter with freedom into normal happy relationships."

Dr. Cameron fixed the responsibility on parental and other teaching.

"There is no evidence that the infant is born feeling guilty about anything. Twenty years later he will respond with anxiety and feelings of guilt to a great many things. But every single thing about which he feels anxious or guilty in his 20th year is the result of what we have taught him," he said.

The McGill University psychiatrist warned against the over-use of guilt and anxiety as control measures. "Most of us have little idea of how subtly they are used, how widespread and how strong are their effects. Still fewer have grasped how much damage their ignorant or unscrupulous use may cause."

GEMS OF THOUGHT

MERIT

True merit, like a river, the deeper it is, the less noise it makes.—Hafiz.

As plants take hold, not for the sake of staying, but only that they may climb higher, so it is with men.—Beecher.

The world more frequently recompenses the appearance of merit, than merit itself.—Rochefoucauld.

How vain, without the merit, is the name!—The Iliad of Homer.

Consciousness of right-doing brings its own reward; but not amid the smoke of battle is merit seen and appreciated by lookers-on.—Mary Baker Eddy.

Merit is never so conspicuous as when coupled with an obscure origin, just as the moon never appears so lustrous as when it emerges from a cloud.—Bovee.

COULD CHARGE MORE

People have allowed themselves to be "bewitched by words," Robert R. Hyde, director of the British Industrial Welfare Society, said in an address in which he told of a chimney sweep who called himself a "fluonomist" and charged sixpence more than an ordinary sweep.

CANADIAN EGGS BECOMING HEAVIER

Thanks To Experts In The Poultry Division

This is the story of the humble Canadian egg—the eating kind, of course—which is gradually moving into the heavyweight class.

That means, just in case it skipped your notice, that the egg you ate for breakfast this morning was heavier, healthier and better looking than those you had five, 10 or 20 years ago.

Chances are that it had a tougher shell, though it wouldn't actually bounce if you dropped it, and that the "white" was thicker, too, which means tastier-looking eggs for those who like them poached.

And, to top it off, there are more of the new variety because the Canadian hen is laying them faster.

Credit for this achievement in bringing a better egg to the Canadian breakfast table goes to the men of the poultry production service of the federal agriculture department and a flock of hens known as the blue-bloods of the barnyard.

The experts are the men who administer the department's "record of production" policy, which aims at the improvement of Canada's poultry industry by placing stress on the use of approved, purebred family stock as laying flocks.

The service keeps tab on the production of selected flocks of certified birds and has proved over the years that an average production of 250 eggs and more per bird is possible with the use of selected hens.

The grand champion among all the hens under the service's statistical eye is one which laid 354 eggs in a single year. This was beaten out by a common barnyard hen which produced 356 in a year but proved to be only a freak and of little use in the plan of breeding improved stock.

Production Up Again

Britain's Iron And Steel Output For October Well Above Average

LONDON.—The figures of Britain's iron and steel output during October, which have just been released, show a considerable production achievement in view of the fuel difficulties and limitations of transport.

Both in iron and steel in October the output was well above the average of the three preceding quarters of this year. The weekly average for pig iron was 155,800 tons compared with 147,300 tons in September and the 130,000 tons weekly average in 1938. Steel production in the same month was 254,300 tons (weekly average) compared with 238,500 tons in September and 200,000 tons in 1938.

The annual rate of pig iron output now stands at rather more than 8,100,000 tons compared with 7,600,000 tons in the same month last year. For steel, the figure is 13,230,000 tons compared with 12,700,000 tons in October, 1945.

Exports, although still below the prewar average, have attained a volume more than twofold that of 1945. The October figures are not yet available, but the September returns show that shipments overseas, both of iron and steel, totalled 143,200 tons compared with the 163,300 and 54,200 monthly average in 1938 and 1945 respectively.

BACKACHE The Plague of Outdoor Men

The outdoor man, whether he be farmer, truck driver, or railway operator, is often subject to backache. This may be the result of exposure to cold and dampness or the result of strain from the jolting and bumping of the vehicle he rides.

To many people, women as well as men, it would be great to be free of backache—one of the most common and annoying of ailments. And here is how you may be relieved of backache and other symptoms of poisons in the blood.

The treatment suggested is Dr. Chase's Kidney Liver Pills. By reason of their stimulating action on both the liver and kidneys, you have two chances to one of getting relief from your backache by using Dr. Chase's Pills. The torpid liver is aroused to action, the kidneys are stimulated and consequently these organs help to purify the blood of the poisonous impurities which bring pains and aches and tired feelings.

Keep regular and keep well by using Dr. Chase's Kidney Liver Pills. 35c. a box.

Dr. Chase's Kidney Liver Pills

Holds One Record

Great Eastern Only Ship To Have Six Masts And Five Funnels

The following article was written by W. Orton Tewson, in "An Attic Smit Shaker."

The coming of the "Queen Elizabeth" recalls the fact that the "Great Eastern"—a full-rigged ship with auxiliary engines—built one hundred years ago, still holds one record of the shipbuilding world. No other ship has ever had five funnels and six masts!

"Noah's Ark was 300 cubits long, 50 cubits wide, and 30 cubits high; since a cubit is about 18 inches, Noah's Ark must have been a formidable craft 450 to 500 feet long," point out Eric Hodgins and F. Alexander Magoun, authors of "Behemoth: The Story of Power."

"No modern marine engineer had been sufficiently courageous to build a competing ship, until, in 1845, Scott Russell and his associates began, upon the banks of the river Thames, the construction of that premature leviathan known as the 'Great Eastern,'" state Messrs. Hodgins and Magoun. "She was 692 feet long, 83 feet beam (118 feet over the paddle boxes), 58 feet in depth, and 28 feet in draft. Her displacement was some 28,000 tons. It took four years to build her."

"She was a famous and picturesque craft, and a triumph of naval architecture. She had a double bottom (its first appearance), and fifty watertight compartments. Yet for all these physical dimensions, she was tragically under-engineered for her size. After living an unhappy and frustrated life, she was—in 1887—turned over to the ship-breakers and her twenty anchors scattered to the seven seas."

Block cuts for printing simple designs can be made by cutting a potato in half, carving the design, and printing by hand.

RATION BOOKS ISSUED PLACES POPULATION AT 12,120,044

The number of ration books distributed for 1946 indicated that Canada's population has increased by 613,389 since 1941.

The Prices Board said that 12,120,044 books were distributed for 1946, compared with 11,658,933 for 1945. Canada's population on the basis of the 1941 census was 11,506,655.

The Board said it could not give details of the population figures by provinces because the territories of ration districts overlapped provincial boundaries.

Some hints are so specialized that they must have slaves to feed them or they perish.

Lethbridge Experimental Station

2, 4-D and Your Lawn

Much has been said and heard about the marvelous new weed killer 2,4-dichlorophenoxyacetic acid, commonly known as 2,4-D. It is different from former weed killers which usually were fatal to weeds due to their contact action. 2,4-D moves into the plant very rapidly and then slowly tortures and starves the plant to death.

An experiment conducted this season at the Experimental Station

the lawns was designed to determine best time to spray, what weeds would be killed, the effect of spraying upon the grasses, and what difference if any between the commercial brands of 2,4-D.

It was found that 2,4-D could be applied anytime from late spring to October 1, providing the temperature was not less than 60 degrees F. and that there was no prospect of rain for a period of 48 hours after application. Another point noted was the better results obtained if the weeds were in active growing condition when application was made.

A period of from ten days to three weeks was required to kill the weeds depending upon the time of application. It was found that all the important lawn weeds of this area namely, dandelion, broad leaved plantain and chickweed could be controlled if more than one treatment was applied an earlier spraying lessened the amount of seed that was formed. Plants escaping the early treatment were controlled by a later spraying.

Our experiments showed no injury to the common types of lawn grasses such as Kentucky blue grass, creeping red fescue and chewings fescue. White dutch clover however was in most cases severely injured by 2,4-D but if lawn spraying was done early enough recovery occurred so that the plant produced seed. If spraying was late in the season, usually enough clover heads had matured so that re-seeding occurred. In no case was white dutch clover found to be entirely killed out. If kept mowed too short, the re-establishment of dandelion seedlings was greatly retarded.

All of the various brands of 2,4-D used gave similar results except that some acted more rapidly than others. The directions for application on the packages proved satisfactory.

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

EXPERIENCE OF ALBERTA TOWN OF PONOKA PROVES VALUE OF PASTEURIZATION

Proof of the efficacy of pasteurization of milk is seen in a report received recently by Health League of Canada officials from the town of Ponoka in Alberta.

During a Canada-wide survey in connection with milk pasteurization, Ponoka officials reported a compulsory pasteurization by-law had been passed in the town in 1944 "following repeated outbreaks of undulant fever, and when it was found that two of the herds used in supplying milk to the town were seriously infected with Bang's disease." Bang's disease, or brucella abortus, in animals can lead to undulant fever, or brucellosis, in humans.

It was noted further that "since then no case of the disease has been reported."

From this report from Ponoka, it is obvious that pasteurization is a means of eliminating undulant fever—a disease the seriousness of which is not revealed in available statistics because of diagnostic difficulties. Undulant fever is a disease which does not show characteristic symptoms.

Nevertheless, undulant fever's toll can be cut through use of pasteurized milk, just as it has been proven that use of pasteurized milk has cut the toll from bovine tuberculosis, scarlet fever, septic sore throat, typhoid fever, paratyphoid and dysentery—all milk-borne diseases.

The example set by Ponoka and some other towns and cities is commendable and encouraging, but the problem of eliminating milk-borne diseases throughout Canada can be solved only through enactment by the various provincial legislatures of compulsory pasteurization legislation which covers all municipalities and other districts. Only then will the Dominion be assured of a milk supply which is 100 per cent. safe. Ontario at present is the only province with compulsory pasteurization legislation in force.

HANDY HINT

If you want to wait a few days before ironing a freshly dampened blouse, mildew can be prevented, if you wrap it in a square of ordinary rubber sheeting and place the bundle in the refrigerator.

HAS NEW IDEA

Doctor Thinks Everyone Should Work As Long As They Like

CLEVELAND, Ohio.—The population of the United States, the statisticians say, will be 150,000,000 by 1980—and this number is expected to include 21,000,000 in the 65 and over age group.

Such a prospect brought an appeal by one medical expert that science should do something about the aged and chronically ill. Dr. Theodore Klumpp, former chief of the food and drug administration of the U.S. department of agriculture, believes that a man or woman should be permitted to work as long as they like.

"We can't plow them as we used to plow under corn, potatoes, tobacco, and little pigs," he told the closing session of the 74th annual meeting of the American Public Health Association.

Dr. Klumpp said that in the past medical scientists have been more preoccupied with the diseases of youth and childhood, but that as a result "we now have an adult population that is larger in proportion than it has ever been before."

It promises to grow even larger as the years go by, he said, and by 1980, the 45 years of age and over group will compose 40.3 per cent. of the population with the 65 year old group at 21,000,000 or 14.4 per cent.

He said that science should go after such diseases as heart disease, coronary thrombosis, nephritis, arthritis and cancer—which are prevalent in the older age groups.

Dr. Klumpp also warned of new problems arising out of the invention of new labor-saving devices which he said would "be on a scale never dreamed of before."

Just the same, he insisted, those in the older groups should be permitted to continue to give their wisdom and mature judgment as long as they are able to do so.

"Youth can loaf content with opiate dreams of future achievements," he said, "but as we grow older the realities of life are more clearly seen and less easily denied, and as we approach 50 to 60, we can no longer derive solace from the pipe dreams of future achievements."

LINE WAS BENT

Attu, westernmost island of the Aleutian chain, is the farthest west of all United States possessions. Technically, it is in the western hemisphere, but international law bent the international dateline to the west of the island, so that it would have the same time schedule as the rest of the chain.

CARRIED REAL COW

With the public impressed by reports of the luxurious appointments of the Queen Elizabeth, it is fitting to recall that one of the chief advertised attractions of the first Cunard, Britania, was a real cow, housed in a special deckhouse with padded sides. The animal provided milk for babies and invalids.

Goat skins are important exports of India, Brazil, Java, the Belgian Congo and Russia.

ABANDONED IN TAXI—Montreal police are seeking the parents of this baby who was abandoned in a taxi on Wolf St., in Montreal. The child, seen with a nurse, is being cared for in a hospital while efforts are being made to establish its identity.

SO VERY TRUE

One of two girls in a subway train was looking at a newspaper. "I see," she remarked presently to her girl friend, "that Mr. So-and-So, the octogenarian, is dead. Now, what on earth is an octogenarian, anyhow?" "I'm sure I haven't the faintest idea," replied the other girl. "But they're an awful sickly lot. You never hear of one but he's dying."

A device has been developed in Australia which automatically makes a scale map of terrain over which it is rolled.

WORLD HAPPENINGS BRIEFLY TOLD

Southwestern Alberta sugar beet growers received \$10.57 a ton for their 1945 crops. It was shown.

The Swedish Academy has awarded Hermann Hesse of Switzerland the Nobel Literary Prize for 1946.

Alberta's 1946 wheat crop has been estimated by the provincial department of agriculture at 137,000,000 bushels.

At Sept. 30 deserters from the British army of the Rhine totaled 472, War Secretary Bellenger announced.

During the war the British army used 40,000 horses, 120,000 mules, 6,000 bullocks, 16,000 camels, 5,000 dogs and 15,700 pigeons.

As a reward for saving hundreds of Christmas puddings threatened with destruction by fire 20 Bath firemen received a pudding each.

The Royal Military College at Sandhurst, England, is to be known as the Royal Military Academy, Sandhurst, with university status.

The Japanese government will take over operation of several coal mines to determine whether nationalization will increase lagging coal production.

Reflecting improvements in shipping facilities, Argentine corn again is being imported into Canada in large quantities, the Dominion Bureau of Statistics reports.

ROYAL STAMP ISSUE

JOHANNESBURG.—A special series of stamps, one penny, two penny and three penny, issued to commemorate the visit of the Royal Family next year, will be on sale from Feb. 17, 1947, it announced. The stamps, printed alternately in English and Afrikaans, will bear the likeness of the King on the one penny, of the King and Queen on the two penny, and of the two Princesses on the three penny.

**SITE IS SELECTED**

Norway Erecting Monument To Memory Of Franklin D. Roosevelt

The site for Norway's monument to the memory of Franklin D. Roosevelt has now been selected. The committee has chosen a high point not far from Oslo's city hall overlooking the Oslo Fjord. Close to the proposed site rises Oslo's most famous landmark: the historic Akershus fortress. Over 55,000 kr. have already been donated toward the monument which is expected to cost over 200,000 kr., and a committee of outstanding public figures will soon announce the opening of competition among Norway's most famous sculptors.—Norway Information office.

Statistics Show That Canadians Spending Plenty

OTTAWA.—Heavy spending engendered by high wartime salaries is continuing in Canada and as yet there is no sign of any let-up, a survey disclosed here.

A Dominion bureau of statistics report on retail sales in September indicated that spending is increasing, possibly as a result of more consumer goods becoming available.

Prices board officials said the report—the latest available—was the best indication of what Canadians were doing with their money.

The officials were commenting on a Sydney, Australia, dispatch which said a spending orgy which came in Australia with the end of the war is petering out and people have become sparing both in their pleasures and domestic purchases.

A source in close touch with the business world said that "Canadians who have it still are spending plenty."

A government official said that while Canadians were spending a lot of money on non-luxury goods they were also paying a good deal for entertaining purposes.

For instance, preliminary figures showed the apparent consumption of alcoholic beverages was 50 per cent. higher this year than in 1945.

Despite the expenditures, a chartered bank statement showed savings deposits still are rising. At Sept. 31 the savings on deposit totalled \$3,524,145,000 against \$3,465,731,000 at Aug. 31 and \$2,934,845,000 at Sept. 30, 1945.

A report on the sales of Canada savings bonds showed that Canadians purchased close to \$500,000,000 worth in the first 30 days after the issues went on sale.

The bureau of statistics report indicated that in September Canadians purchased more of just about everything, except shoes. Retail sales generally were 11 per cent. higher, but shoe sales were down two per cent. The Christmas season is expected to bring a market increase in retail sales and of spending generally.

STUDY NEW PLAN OF GRADING WHEAT

Board Of Grain Commissioners Investigating On Protein Basis

CALGARY.—The board of grain commissioners is investigating the possibility and practicality of grading wheat on a protein basis, Dr. D. A. MacGibbon, assistant commissioner of the board of grain commissioners, told the Alberta wheat pool annual meeting at its opening session here.

D. G. MacKenzie, chairman of the board, is head of the investigating committee, said Dr. MacGibbon.

If protein grading is established, he said, the present system might have to be discarded or the system retained with protein content added as a factor and perhaps new grades specified.

He said the present grading system recognizes protein content to some extent as it specifies a predominance of hard, red, vitreous kernels in the top grades and such wheat is usually high in protein. On the other hand where plebeian wheat is present it is penalized and that class of wheat is low in protein.

Grading on a protein basis would be injurious to northern districts, Dr. MacGibbon said, and particularly to northern Alberta.

There would be physical difficulties in operating protein grading and it would be more expensive, Dr. MacGibbon said.

Soil content and rainfall are major factors in determining the protein content of wheat, it was explained.

YOUNG VETERANS

Have Crowded Canadian Universities Anxious To Complete Education

OTTAWA.—Young Canadians who have swapped battle dress for campus garb now number more than the Dominion's whole university student body of pre-war days, it was disclosed.

Scattered in 29 universities, from coast to coast, veterans pursuing college classes total 35,000, and the department of veterans' affairs said this number was expected to hit 40,000 next year as more complete matriculation studies. Included are about 2,000 former servicemen.

An official estimate said there were about 16,000 veterans in their first year at university, 12,000 in second year, 4,000 in third year and 2,000 in fourth. Another 1,000 are taking post-graduate courses. In addition, there are 800 Canadian veterans studying in the United States and 200 in Great Britain with the department's assistance.

Veterans enrolled in the University of Toronto total 9,700—more than one-fourth of registration in Canada. Other colleges:

University of British Columbia; Vancouver—4,700; McGill, Montreal—3,200; University of Manitoba, Winnipeg—2,900; University of Saskatchewan, Saskatoon—2,400; University of Alberta, Edmonton—2,200.

WINS NOBEL PEACE PRIZE

Co-winner of the Nobel peace prize is Miss Emily Greene Balch, 73, a frail little woman who is undergoing treatment at the Newton-Wellesley hospital Wellesley, Mass. "This is not an award to me," she said after reading the cable telling her of the honor. "It is an award to the organization in which I worked so long, the Women's International League for Peace and Freedom."

\$500,000,000 In Gratuities Paid To Personnel

OTTAWA.—Former members of Canada's fighting forces have drawn around \$500,000,000 in gratuities and re-establishment credits, a survey of the services showed.

Close to 1,000,000 men and women have obtained benefits, it was shown, with the army outnumbering the combined totals of the other two branches, both in number of beneficiaries and in the aggregate sum received.

The grand total involved to date—which includes applications already approved but not yet actually paid out—is approximately \$576,700,000. This is made up of \$492,850,000 in gratuities payable directly to discharged service personnel in cash and another \$83,850,000 in re-establishment credits, usable for the purpose of buying business equipment, household articles or the like.

Besides the total for re-establishment credits, further large sums have been paid out in putting veterans through college or technical training and in aid under the Veterans' Land act. The totals for these were not available.

One-time army members so far have collected about \$300,000,000. The total number of cases approved for payment by the army is 568,333. Of these, payment has been made to all but 76,431, and these are being paid off now.

In the navy, 103,380 applicants—including some 6,000 Wrens—have qualified for a total of \$42,850,000 in gratuities. A navy spokesman said it was expected all applications would be cleaned up by the end of the year except for those serving in the interim force, who would be finished up by about next September.

Former air force personnel have made 226,232 gratuities applications with a total payment of around \$150,000,000.

HONORS CANADIAN

Bust Of Sir Charles Saunders Unveiled At Experimental Farm, Ottawa

OTTAWA.—The man who developed the wheat that made Canada famous—Sir Charles Edward Saunders—was honored in a ceremony at the central experimental farm here when his bust was unveiled in a building bearing the name of his father, William Saunders.

Sir Charles, who died in Toronto 10 years ago, was best known as the developer of Marquis wheat, but also evolved other varieties such as Prelude and Garnet. He is credited with originating the first important steps in plant breeding in Canada, and agriculture department official estimate that his Marquis wheat has brought revenues of \$20,000,000 a year to the Dominion.

U.K. RATIONS TO CONTINUE

LONDON.—Indications that food rationing in Britain will continue for at least another 1½ years came from Rt. Hon. John Strachey, Food Minister. He told a questioner in the House of Commons that ration books through July, 1948, are being printed.

SHOES FOR GERMANS

BERLIN.—Britain is to provide the British zone in Germany with 95,000 pairs of shoes and it is possible that all shipments will be delivered to hard-hit areas by the end of the year, the control commission stated.

PRAIRIE FARMERS TO RECEIVE ADDITIONAL CASH ON 1945-46 CROP DELIVERY

OTTAWA.—Trade Minister MacKinnon announced the completion of arrangements for the payment to prairie farmers of an additional 10 cents a bushel on wheat delivered in the 1945-46 crop year.

In a statement, Mr. MacKinnon said the adjustment would mean the distribution of more than \$23,000,000 to producers in the prairie provinces but did not indicate when the payments would start.

The payment results from the new wheat price-policy announced by the government last July under which the initial payment on wheat was increased from \$1.25 to \$1.35 a bushel, retroactive to the 1945-46 crop year. The payment thus applies to producers who delivered wheat to the Canadian wheat board between Aug. 1, 1945, and July 31, 1946.

Mr. MacKinnon said the payment would be made out of the wheat board surplus on 1945-46 operations.

He added that producers would receive the payment through their local elevator agents. When the payment is made, the producer will surrender his 1945-46 producer certificate and will receive instead an official receipt which he should retain in case a further payment is made on board operations during the five-year period from Aug. 1, 1945, and July 31, 1950.

The original producers' certificates as surrendered by producers will be forwarded to the head offices of the elevator companies making the payment and later will be transferred to the board.

Mr. MacKinnon stressed that "under no circumstances" should producers send their 1945-46 certificates to the head office of the board as the payment would be made through country elevator agents.

He said the board now has made available to producers approximately \$25,000,000 during the last 30 months in payments in connection with the 1940, 1941, 1942, 1943 and 1945 crop accounts.

Noah used petroleum, in the form of pitch, in building his ark.

FAVOR PLAN

Manitoba Municipalities Approve Car Insurance On Compulsory Basis

WINNIPEG.—A resolution urging that automobile insurance be put on a compulsory basis and that it be issued and controlled by the provincial government was approved by delegates to the 43rd annual convention of the Union of Manitoba Municipalities here.

Other resolutions approved included one asking that the provincial government pay a portion of the liquor control commission profits to the municipalities as a grant to enable them to keep roads in repair.

Delegates approved a resolution asking that the provincial government be requested to increase the legislative grant to an amount sufficient to pay 50 per cent. of the cost of rural education throughout Manitoba.

FISHERMEN HAPPY

All-Time Record Price Being Paid For Lake Winnipeg Whitefish

WINNIPEG.—Lake Winnipeg fishermen will receive approximately \$400,000 for whitefish produced during the past summer season, Resources Minister J. S. McDiarmid of Manitoba said here.

An all-time record price of 19 cents a pound will be the unit price for the 1946 catch, he said. The gross amount to be paid fishermen will be the highest in the 64-year history of the Lake Winnipeg whitefish fishing industry.

Previous record amount was \$335,000 in 1945 when 15-cents-a-pound was paid.

SUIT ESPECIALLY VALUABLE

CHICAGO.—Benjamin Kolkey told Fillmore police that a burglar broke into his home and stole six suits. He expressed hope the officers would find one of them, which he described as especially valuable. In one of the pockets, he said, was \$980 in cash.

CHARGED WITH CARELESS DRIVING—Screen Actress Louise Albritton was charged with driving "negligently and carelessly" in a \$53,702 damage suit filed in Los Angeles by Mrs. Mary Sprosty, mother of Margaret Sprosty, 10, who suffered multiple injuries when Miss Albritton's car struck her Oct. 22.

NOT COMPULSORY

Poles In Canada Need Not Comply With Legation Call

OTTAWA.—Poles in Canada are not compelled to comply with a call from the Polish legation here for a general registration with the Canadian representatives of their home government, the department of external affairs said in a statement.

The department's announcement was prompted by a statement issued by the legation last week, calling for a general enrolment of all Polish nationals in the Dominion.

"It should be clearly understood," the department said, "that under Canadian law no one in this country need present himself for registration at the Polish legation unless he wishes to do so. There is no law in Canada which compels anyone to comply with an order on the part of a foreign government to register at its diplomatic or consular offices."

Regarding former members of the Polish armed forces arriving in Canada, the department said it was expected they would remain in this country and eventually become citizens.

Canada's Wheat Beat World Food Problem

CALGARY.—Canada and the United States together exported about 750,000,000 bushels of wheat, including flour, in the year ending June 30, 1946, George Melvor, chairman of the Canadian wheat board, said in an address to the Alberta wheat pool here.

This constituted the largest wheat export in any 12-month period in the history of the north American continent and in addition to these supplies of wheat, both countries supplied quantities of other grains for human consumption.

"It was this unprecedented effort on the part of Canada and the United States which broke the back of the world food crisis of 1945-46. The world food problem of last year—one of potential hunger and starvation—was reduced to a problem of inadequate rations in many countries... but the worst that could have happened did not materialize."

Transportation has determined the board's attitude in regard to delivery quotas so far this year, he said.

"When navigation closes on the Great Lakes we will not have an adequate stock position in eastern Canada with which to provide for the requirements of our domestic mills and to provide for exports from Atlantic ports during the winter months. Two years ago we had 127,000,000 bushels of wheat in the east at the close of navigation. Last year we had 90,000,000 bushels. This year we will have 40,000,000 to 50,000,000 bushels in the east at the close. To maintain even a moderate export movement via Atlantic ports from December to April inclusive, it will be necessary to rail a considerable quantity of grain from the lakehead to eastern seaboard during the winter months. This again will represent a transportation problem of considerable magnitude..."

"The main competitor that we have for available transportation has been the coal movement to and within eastern Canada. One cannot be critical of those who have sought to secure transportation requirements on a relatively large scale for a deferred movement of this commodity which was essential to the heating of homes and the maintenance of industrial production during the winter months."

"...Ever since sufficient wheat became available at country points in Alberta, we have had a good ear supply for shipment to the Pacific coast. This movement has been running at near maximum levels... In 1945-46 we shipped about 67,000,000 bushels of wheat through Pacific coast ports. We hope to do somewhat better this year."

Mr. Melvor said that under the circumstances of a current tight supply position and the possibility of future change in that position, the wheat board is continuing a policy of selling its wheat as rapidly as it can be placed in export position.

"Such a policy is reassuring to those countries which are obtaining Canadian wheat and flour in their time of need. It will also assure that Canada will not be over-stocked with wheat when the present sellers' market is over."

FEED GRAIN DROP

Agriculture Minister Gardiner Urges Eastern Farmers To Increase Production

NIAGARA FALLS.—Agriculture Minister Gardiner predicted a dwindling supply of western feed grains for eastern consumption and urged eastern farmers to increase their own production of feed if they hoped to maintain their present output of livestock and dairy products.

In an address to the annual convention of the Ontario Creamery association, Mr. Gardiner observed that production of feed grains had been lower in eastern Canada in recent years than immediately before the war while output has been higher in western Canada.

CONTINUES POPULAR

People Know Canada Savings Bonds Are Good Investment

OTTAWA.—Subscriptions in the first month of sales of Canada Savings Bonds surpassed the amounts subscribed in the first and second war loans in 1940 and 1941, a survey disclosed.

From Oct. 14, when the Canada bonds went on sale, to Nov. 15, approximately 1,149,180 Canadians subscribed more than \$467,223,850. Subscriptions in the first war loan totalled \$250,000,000 and in the second \$324,945,000.

Biggest previous loan was the \$2,000,000,000 Ninth victory loan in 1945.

TOURIST REVENUE

TORONTO.—The Canadian tourist business increased 28 per cent. in 1946 in comparison with 1945 and probably resulted in 15 to 20 per cent. of Canada's foreign exchange, Leo Dolan, chief of the federal government travel bureau said in an address to the Advertising and Sales club.

MY WEEK

by R. J. Deachman

Some time ago H.E. Rice of the "Montreal Forester", one of the many right country editors of the Province of Ontario, put out a story in which he suggested that we should have the same petty at one as abroad, that is all parties should unite on a common purpose, while the dear old party system walked out of the window.

To this I replied that criticism was worth retaining, we should develop it rather than repress it and that elimination of criticism might be the death of good government.

Now Mr. Rice comes back with these words:

"We are not persuaded that the values of criticism, as we know it in the House of Commons, are such as to justify the many weaknesses of our party system. We place a party in power because it has a majority of followers in the House pledged to support its platform. Any member adhering to such a party who dares to criticize the leadership, or breaks from the policies laid down by caucus vote, is ostracized, and usually read out of the party parliamentary group. In other words, for him, criticism is fatal."

I want to get this matter clear. So let us Brother Rice and I continue the fight there will be nothing done about it, so in a spirit of conciliation I offered to go 50-50 with Mr. Rice. My contention is that if all parties were abolished how could they be prevented from being born again? Men with common views would group together in order to carry on their purpose so that all Mr. Rice's effort would be lost.

Now here's where the 50-50 comes in. The two old parties are coming together. The differences between Liberal and Conservative are no longer clearly marked. If a man from Mars came along and studied the situation for a few years he would have difficulty in distinguishing which was which. In time the dividing line is likely to disappear.

Under these conditions much time is wasted. The House spends time going back over past history, living on the ancient grudge which creeps and never dies. Join the two old parties in wedded bliss and let Mr. Colwell take the others—he will have his hands full which will be good for him. Mr. Rice will then have what he wants—less talk and more action—and this is important. I shall have the pleasure of writing about it, telling the funny things which are certain to happen.

If I am right in this contention union is inevitable. The narrower the dividing line becomes the easier it will be to cross. It may take time to bring it about but it will come. There will be substantial gains in such a move, not the least of which will be a better House of Commons.

Mr. Rice and I are upon open ground, we are trying to find a better way of doing things. It is a subject which ought to be discussed especially by weekly papers. The nation wants a more efficient House of

Commons. It wants one that does more work in less time, one in which the casual visitor can decide, at a glance, the side to which he belongs. It is so hard to decide to which party a man belongs when he can't see with the naked eye the difference between the two.

P.S.—What are we going to do about the Senate—the Senators will be angry if we forget about them.

Here and There

TAXES REDUCED (?)

Canadians are trying hard to figure out why the Government has said that income taxes are being reduced.

Actually a wife who works has her income reduced to \$250, while the rest of her salary is tacked on to her husband's which makes it taxable at a higher rate. Is this reducing the income tax?

Obviously this action was taken to induce many married women to return to their homes and make way for returning servicemen.

There are however some fields in which it is very desirable that women work. School teaching is one of them. In this case it would not be desirable to replace women completely in the elementary and intermediate schools with men. This being the case many women teachers will have to choose after January first between carrying on in the school room where wages have hardly kept pace with general salary increases across Canada—or having to pay a large proportion of their wages for income tax. Thus it would appear that the Government's policy is going to have—unless it is changed—a very unfortunate effect on married women who are teaching school. It might have appeared to the experts when making these changes that there are some occupations in which women are needed. Particularly in Alberta when there are 2000 too few teachers does this seem a short sighted policy?

Then there is the social angle. Many couples do not have children. The woman works if she is going to have special measures passed to force her to keep house there is the possibility that this will appear a bar to legal marriage. Those who are contemplating matrimony will think seriously if it costs three or four hundred dollars extra a year to be married.

Some suspect that a thorough perusal of the new income tax hardly justifies the advance notice of a reduction. We will leave that to those who have to pay the taxes.

SOCIAL SECURITY

There may be those who misanderstand this term. There will never come a time on this earth when men do not have to work. If any able bodied man is able to live off the state without honest labour he is on the road to moral poverty and decay.

Work seals a man's soul against

FAMILIES DELIGHT in the extra freshness and extra flavor of vacuum-packed Maxwell House Coffee. It's sealed in the Super-Vacuum Tin by the Vita-Fresh Process to ensure roaster freshness.

disintegration. It sharpens his wits. It fosters resourcefulness. Work is man's greatest blessing and those who think that they can escape it are throwing themselves into a deeper pit.

R.A.A.A. Hold Annual Meeting

Meeting in the Opera House last Friday evening, November 29th, the Raymond Athletic Association held their annual meeting for the purpose of reviewing the past year's activities and preparing for the coming season of sport.

In the election of officers which place, J. Golden Snow was again put in as president with J. V. Hoggie as Vice President and Murray Holt as Secretary Treasurer.

In his remarks of the evening President Snow expressed his appreciation to the Club and to the people of Raymond for their support in the past year and asked that the same support be given the coming season.

Highlight of the meeting was the organization of all branches of sport each under a separate committee of three and that they carry on and organize their respective sports independently. The chairmanship of each sub-committee was left to be chosen by the executive.

Routine matters of business were discussed and M. Rayo Woolf was elected Honorary President of the Association.

The following is a list of the committees and the first name in each case designates the chairman of the committee.

HOCKEY & RINK

Public Notice

TAKE NOTICE that the Council of the Town of Raymond intends to pass a Zoning Bylaw after eight clear weeks from this date. Any interested person may inspect the proposed Bylaw at the Town Office at any time during office hours.

Any person objecting to the passing of the said Bylaw may address their objection in writing to the undersigned.

Such objections will be heard by the Council at the Town Hall Jan. 13th 1947 at 8 o'clock p.m.

Dated this 27th Nov. 1946.

W.L. JONES
Secretary Treasurer
Town of Raymond

Results of Smut Tests on Seed

The smut diseases of wheat, oats and barley, especially those that are carried on the surface of the seed, cause heavy losses annually in Western Canada. To reduce these losses is the main object of the smut tests offered by Line Elevators Farm Service. In addition to rendering a distinct seed service to individual farmers, however, the examination of a large number of seed samples from many different points provides valuable information in respect to the prevalence and distribution of smut diseases of cereals in Western Canada.

Smut Test Results. During the 1945-46 seed testing season, 6,069 wheat samples, 1,600 oat samples, and 1,602 farmers' samples of barley seed from all over Western Canada were examined for the presence of surface-borne smut. On the basis of the smut test, the samples were grouped into three classes, (1) clean (no smut), (2) trace of smut only, and (3) more than trace of smut and definitely requiring seed treatment for smut control. The percentage of samples of wheat, oats and barley falling into the different smut classes is given in the accompanying table.

% of Samples Carrying Smut

	No. of Samples	Clean Only	Trace	More than Trace
Wheat	6069	38.8	41.3	19.9
Oats	1600	9.7	52.2	38.1
Barley	1602	4.9	36.4	58.7

Conclusion. The results of the smut tests show that almost 40 per cent of the seed stocks of wheat, 38.1 per cent of those of oats, and 59 per cent of the seed stocks of barley used by farmers in Western Canada in 1946 carried more than a trace of smut, and definitely required seed treatment for smut control. In the light of such evidence it would be difficult to exaggerate the seriousness of the smut situation in Western Canada. This year, farmers would be well advised to make full use of the smut testing service offered by the Elevator agents.

Sugarless BUT Sweet

MAGIC Honey Pound Cake

1 1/2 c. seedless raisins 2 1/2 tsp. Magic Baking Powder
1/2 c. shortening 1/2 tsp. salt
1/2 c. honey 1/2 tsp. vanilla extract
3 eggs, well beaten 1/2 tsp. lemon extract
2 1/2 c. sifted all-purpose flour

Rinse raisins; drain; dry on towel—cut fine with scissors. Work shortening with spoon until fluffy and creamy; gradually add honey, while continuing to work with a spoon. Add beaten eggs, and blend. Gradually stir in sifted dry ingredients; heat with spoon until smooth. Add extracts, raisins; stir to blend. Bake in greased, lightly floured 9" x 5" x 3" pan at 300°F. for 2 hours.

MADE IN CANADA

OUR COMPLETE SHORT STORY—

A Better Place

By VICTOR DI CASTRI

Copyright
Wheeler Newspaper Syndicate

JACKIE worked feverishly on the trench with his spade as the forest fire bellowed a few yards away. Grinly he wished with all the passion of his fifteen years that he had been sent to Reform School instead of to the Mt. View Forestry Camp to fight forest fires. "That stupid old judge with all his crazy ideas about juvenile delinquency, treating me as if I didn't know what it was all about," Jackie fumed.

He looked up at the sun which was a red ball's-eye in the black sky beating into him the fact that he was mortally afraid of the fire and that everyone in the camp knew it. How else could you explain that he didn't have a friend in the camp except Dolly the pet calf? And now even Dolly was gone. Oh yes, every now and then you could still hear the bell she wore around her neck tinkling in the distance but her chances of coming through the fire alive weren't worth peanuts even if the so-called best man in the Camp had gone into the roaring flames to bring her back.

Jackie looked down the line of sweating, anxious faces. One of the fellows said, "Yeah, that's what happens when you make a pet out of an animal. You put 'em up against nature and they ain't got anything to fight with."

And then Higgins, the Camp Superintendent yelled, "Bob's been gone ten minutes now. That's too long. Something's happened to him."

Jackie had forgotten all about Bob. It seemed like an eternity since he had volunteered to go in and bring back Dolly.

Higgins was shouting to one of the other boys, "You take charge here, I'm going in after Bob."

Something snapped inside of Jackie. He didn't like Bob. Bob was like the rest of the fellows, only more so, enjoying their work, thankful that they had been sent to a Forestry Camp instead of Reform School, and as Higgins constantly repeated, "looking forward to the day when they would take their places in society unshamed of their past and hopeful for their future."

Up to this moment Jackie convinced that Bob was out there in the flames for the sole purpose of doing something spectacular so he could brag about it later in the camp. Bob was always being praised for something, Jackie guessed grudgingly that that's how you got to be a Section Leader. Nevertheless, deep down inside Jackie had been almost certain Bob would bring Dolly back alive. And now—

Jackie leaped across the trench as Higgins hollered, "Get back to your job." Then incredulously the Superintendent added, "You can't do that. Come back here."

But Jackie didn't hear. He was listening intently. It was like the night he and his former pals had broken into the bakery. He had told them then that he had heard a sound but they had only laughed. And look where that laugh had got them. In a Forestry Camp. He had heard the sound now even if the crackling flames were trying to convince him otherwise. There just had to be a sound. It was just a matter of listening hard enough. There it was! To the right of him. No, to the left.

His eyes smarted and tears rolled down to the corners of his mouth. He tried to swallow but there was nothing to swallow but smoke. He gasped for air as the flames lashed out at him. Where was Dolly? There was her bell again. It was to the right. He ran, ducked and leaped through the inferno as Dolly's bell pounded in his ears.

And then he had his arms around her. For a moment he just held her and cried as Dolly whimpered and snuggled close to him. And then he heard a groan. It was Bob, under a tree.

Something in Jackie's heart melted. Bob had found Dolly and he would have saved her if he hadn't been caught under that falling tree. Jackie knew then that Bob hadn't gone into the fire to show-off. He wouldn't be lying there like that. Even his groan had had the steadiness which personified Bob; there was no panic, no fear.

Jackie rushed over to him. "It's O.K. Bob, I'll get you out of there." A trace of a smile tried to steal across Bob's grimy, sweaty face but the effort was too much and he just closed his eyes.

Jackie never knew how he got the burning tree off of its human stand or how he managed to drag Bob through the fire. But everyone was telling Jackie, "You were great kid." Their pals on the back said even more. Even Higgins said, "To tell you the truth, Jackie, I'm surprised, but I've just got to shake the hand of a lad who risks everything to save a pal."

Jackie clasped the older man's hand and tried to say "thanks," but something caught in the boy's throat. It was a new and strange feeling of shame. He hadn't gone in to the fire to save Bob, it had been solely for

Dolly. But Jackie knew now that he had sweated out his fear and that in a similar situation he would try and be another Bob.

It was a wonderful feeling to go through fire and come out unafraid. Didn't God say going through fire cured you of something and prepared you for a better place?

OBSELETE MUNITIONS DUMPED

Under supervision of an Ordnance Corps expert, obsolete ammunition is being dumped in Georgian Bay, 50 miles north of Owen Sound, by the War Assets Corp. Madeline Roly is seen with some of the munitions being loaded aboard the S.S. Northern for dumping into 480 feet of water. The ammunition being disposed of ranges from six-inch naval shells to Piat anti-tank bombs.

Used Century Ago

Bronze Chandeliers To Be Installed In British House Of Commons

Bronze chandeliers whose candles gave light for Pitt and Burke will probably carry some of the newer lighting of the new House of Commons, though they have not been seen in the Chamber since the fire of 1834.

They have been bought with that intention by the Ministry of Works from the Tennyson-d'Eyncourt family, in whose Lincolnshire seat of Bayona Manor, really, five of them have been hanging since that date. There were originally eight, but one of the squires of Tealby put three of them in a village school which was burnt down and they were lost.

At the time of the 1834 fire that of the family, an uncle of Lord Tennyson, was member for one of the London boroughs, and he acquired the chandeliers to light a new banquet hall. The last occupier of the manor, Mrs. E. C. Tennyson-d'Eyncourt, has gone, after the fashion of the times, to live in a neighboring cottage. She is glad to see the return of the chandeliers to Westminster, and with them the glass candle shades, which have all been carefully preserved.—Manchester Guardian.

QUITE UNEXPECTED

Ritchie Roberts, a carpenter, got more compensation than he bargained for in doing repair work at a deserted house in Clinton, Ill. He paused in his work to leaf through a moldy book and out fell a 71-year-old \$10 bill.

SMILE AWHILE

During the Sunday morning sermon, a baby began to cry at the top of its voice, and its mother carried it toward the door.

"Stop!" said the minister. "Your baby is not disturbing me."

The mother turned toward the pulpit and addressed the preacher: "Oh, he ain't, ah't he? Well you're a-disturbing him."

Calling her husband into the kitchen, the worried housewife exclaimed in annoyance.

"Good gracious, Jack! How could you think of bringing that man Robinson home to supper when you know I'm fall cleaning?"

"Hush, m'dear!" said hubby urgently. "He's the only man I know strong enough to help me move the dining-room side-board."

The door of the ladies' hairdressers' shop opened and in came a meek-looking little man, twisting his hat nervously in his hand.

One of the assistants approached him.

"What can I have the pleasure—"

—she cooed.

"Er—could you spare a blond hair for my shoulder?" he stammered. "I want to make my wife jealous."

As they walked home together, Tom told Fred he was going to give his wife a serious talk on economy.

When they met again next day, Fred asked:

"Well, did you give the missus that economy lecture?"

"I did," replied Tom.

"Any results?"

"Yes—er—I'm going to give up smoking."

Counsel was cross-examining a farmer.

"Now," he said, "don't quibble. Do you understand a simple problem or not?"

"I do," replied the witness.

"Then tell the court this: If fifteen men ploughed a field in five hours, how long would thirty men take to plough the same field?"

"They couldn't do it."

"Why not?"

"Because the fifteen have already ploughed it."

"Oh, mamma," exclaimed little Elizabeth, when the dessert was served, "how I wish you had told me this morning that you were going to have ice cream for dinner!"

"Why, dear, what difference would it have made?" asked mother.

"Oh, lots!" replied the youngster, with a sigh. "I could have expected it all day, then!"

It takes 4,500 pounds of coal to make a new automobile.

IF HEAD COLDS

HANG ON..

DO THIS! To relieve discomforts, one of the best things you can do is put a good spoonful of home-tested Vicks VapoRub in a bowl of boiling water.

Then feel welcome relief come as you breathe in the steaming medicated vapors that penetrate to the cold-congested upper breathing passages! See how this soothes irritation, quiets coughing, and helps clear the head-bringing grand comfort.

FOR NEEDED RELIEF... rub throat, chest and back with VapoRub at bedtime. Vicks VapoRub works for hours—2 ways at once—to bring relief from distress. Remember it's Vicks VapoRub you want.

VICKS VapoRub

Forest Conservation

Is Of Greater Importance Than Placing Embargo On Lumber

Sir Oliver Mowat made the north shore of Georgian Bay a hive of sawmill industry by putting an embargo on sawlogs which went at the time going to cities like Bay City and Saginaw in Michigan but the same north shore is far from being a hive of sawmill industry at this time says the Port Arthur News-Chronicle. It is more noted for its ghost towns. That, however, was not due to the embargo. It was due to cutting without regard to the future. It would appear therefore, that conservation, whether with or without embargo, is more important.

IMPORTANT MEAL

No matter how busy a mother may be, she will find that it pays in more ways than one, to serve a substantial breakfast at home. Health officers of the Department of National Health and Welfare, in stressing the value of a well-balanced, fresh, morning meal, suggest that this will save the mother a lot of trouble later, since "a well-fed child is a happy child" and will not require as much attention later in the day.

First Wheat Shipped East 70 Years Ago

Only 860 bushels was the amount and to get it to Montreal for making into flour was a real job. What it meant to Canada and the world in the years since is common knowledge but the details should be kept fresh in our minds and dug credit given to those who made our West possible by their pioneering and courage. It was the Ogilvie brothers, Alexander Walker Ogilvie, John Ogilvie and William Watson Ogilvie, who brought the first shipment of 860 bushels of wheat from the plains of promise. Grown by Selkirk settlers of Manitoba, this small but precious cargo was hauled on carts to Winnipeg, portaged down the Red River into the United States and thence shipped by rail to the flour mill of the Ogilvie Company in Montreal. They also exported the first shipment of flour milled under British rule in Canada.

A bird's feather, for its size and weight, is said to be the strongest structure in nature.

Just One Advantage

Horse Will Run Away But Motor Car Seldom Does

Those who prate of the "good old days" are wont to point out that a horse would take you home of its own accord, something an automobile can never do. True enough, but on the other hand, a motor car seldom runs away.

Anyone who can remember the horse-and-buggy days recalls the occasional runaways with something akin to horror. There was a thrill to them, but they were terrifyingly dangerous. A panic-stricken horse can become an agency of dire destruction.

Perhaps automobiles are superior in many ways, but at least they never shy at a piece of paper blowing about, take the bit in their teeth and set off down the street at break-neck speed, out of all human control.—Windsor Star.
